Backend: MySQL, Postgres, Express, Node, Django

Projects

What Movie Was That? | <https://github.com/SamiF812/What-Movie-Was-That-> | JavaScript Developer
<https://samif812.github.io/What-Movie-Was-That-/>

- Allows the user to look up any movie and get the movie information and a trailer to watch.
- This app fetches OMDB API to receive movie information and YouTube API to get a movie trailer. I was primarily focused on JavaScript, making the fetch requests, and using logic to manipulate the data to provide the user with the appropriate information

- Tools/Languages: HTML, CSS, Bulma JavaScript, OMDB API, and YouTube API

Code Quiz | <https://github.com/bthalpin/Code-Quiz> | <https://bthalpin.github.io/Code-Quiz/> JavaScript Developer

- A quiz app that randomly selects a trivia question for the user.
- As sole software developer for the project I organized the code in a modular code structure so that it can be easily expanded on to make a more robust quiz app with user generated questions.

- Tools/Languages: HTML5, CSS3, JavaScript

Weather Forecast | <https://github.com/bthalpin/Weather-Forecast> JavaScript Developer
<https://bthalpin.github.io/Weather-Forecast/>

- A weather app that uses Open Weather API to display accurate weather information for up to five days, anywhere in the world.
- 1-2 sentences on what the project accomplishes and your responsibilities
- Tools/Languages: HTML5, CSS3, Bootstrap, JavaScript, jQuery, and Open Weather API
