Portfolio: https://bthalpin.com | https://www.linkedin.com/in/brian-halpin | https://github.com/bthalpin

I am a full stack software developer specializing in MERN stack. Since the moment I was exposed to programming, it was all I ever wanted to do. I have always had a passion for problem solving, but thought my love of logic puzzles would be something I would only ever do as a hobby. Software development has given me an avenue to not only do what I love, but also to engage me and challenge me to always improve my skills.

SKILLS

Frontend: HTML5, CSS, jQuery, JavaScript, ReactJS, Bootstrap, Bulma
Backend: MySQL, Postgres, Express, Node, Django
Non-technical:

CREDENTIALS

Rutgers Coding Bootcamp – May 2022
CompTIA A+ Certification - December 2017
B.S. - Mechanical Engineering - Rutgers University, School of Engineering (New Brunswick, NJ) - May 2003

RELATED EXPERIENCE

WHAT MOVIE WAS THAT?
https://bthalpin.github.io/What-Movie-Was-That | https://github.com/bthalpin/What-Movie-Was-That

JavaScript Developer
- Allows the user to look up any movie and get the movie information and a trailer to watch.
- This app fetches OMDB API to receive movie information and YouTube API to get a movie trailer. I was primarily focused on JavaScript, making the fetch requests, and using logic to manipulate the data to provide the user with the appropriate information
    - **Tools/Languages:** HTML, CSS, Bulma JavaScript, OMDB API, and YouTube API

CODE QUIZ
https://github.com/bthalpin/Code-Quiz | https://bthalpin.github.io/Code-Quiz/

JavaScript Developer
- A quiz app that randomly selects a trivia question for the user.
- As sole software developer for the project I organized the code in a modular code structure so that it can be easily expanded on to make a more robust quiz app with user generated questions.
    - **Tools/Languages:** HTML5, CSS3, JavaScript

WEATHER FORECAST
https://github.com/bthalpin/Weather-Forecast | https://bthalpin.github.io/Weather-Forecast/

JavaScript Developer
- A weather app that uses Open Weather API to display accurate weather information for up to five days, anywhere in the world.
- I developed a weather forecast ap
    - **Tools/Languages:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, and Open Weather API
